MagnetVision

Revolutionizing the MRI Experience

Engaging Entertainment for Patient Comfort

The MagnetVision 3D cinema technology brings images to life with photographic realism that transports patients into an immersive world of entertainment, easing anxiety and boredom. MagnetVision's stunning LED system will delight your patients introducing them to a virtual 3D world they will never want to leave! By creating the ultimate entertainment system in your MRI facility, you'll eliminate appointment cancellations and patient sedation while creating a competitive advantage for your facility!

See the future of patient comfort for the MRI environment with Resonance Technology today.

Patient Comfort is the Key

Studies reveal that about 12% of MRI examinations are cancelled because of patient anxiety surrounding long, confining imaging procedures. Stay miles ahead of the competition with this leading edge technology that puts patient comfort on the big screen with a jumbo 47 inch 3D monitor!

MagnetVision Features Include:

- Giant 47" viewing screen
- 1920 x 1080 resolution, viewing full HDTV 1080P
- Contrast ratio of 4,000,000: 1
- MRI-safe device
- 2D and 3D compatible viewing screen
- Easy patient set up
