RP276K Testicle Protection for Boys
RP276-S-SET Testicle Shield Set for Children aged 1 to 10

Made in Germany

RP276 – Testicle Shield for Men/Boys/Children

This model of male gonadal protection completely covers the penis and scrotum with a lead equivalent value of Pb 1.00 mm. MAVIG took special attention to patient safety during the use of the testicle protection, so that there is no risk of injury to the patient.

The hook & burr fastener gives stability when correctly adjusted. This model series can be unfolded via press studs for cleaning and disinfection.

Also available as patient protection in paediatrics for X-ray images in medical diagnostics.

- **Protective Material** Multilayer lead rubber material
- **Lead Equivalent** Pb 1.00 mm
- **Outer Cover/Colour** Soft PVC cover in light grey (boys/men);
