

Radionex<sup>®</sup>

RX500

Made in the USA

# Apron for Frontal Protection

## RX500

Front protection in its pure form. Comfortable, wide cross bands allow the apron to slide off easily through the sterile surgical coat.

- Proprietary patented LEAD-FREE inner core
- Full protection over the entire front part
- Easy to put on and take off with closures in the front area
- Universal size

Produced with proprietary patented LEAD-FREE protective material, the apron meets the ASTM Standard for occupational health safety requirements while providing a comfortable solution for extended wearing periods in radiological environments.

### Material / Lead Equivalent Value

X-ray protective material: **Front** protection in Pb 0.35 mm or Pb 0.50 mm.  
**Back** protection in Pb 0.25 mm.

### Colors / Code

Available colors:

Denim	<b>Code 10</b>	Sky Blue	<b>Code 20</b>
Geranium *	<b>Code 30</b>	Cool Grey	<b>Code 40</b>
